

PAPERJET[®] fit

PAPERJET[®] FIT

**THE COMPACT POWER PACK OF
PAPER PADDING SYSTEMS**

EXTRA STRONG, NARROW PAPER PADDING FOR SMALLER PACKAGES

PaperJet® Fit – compact, convenient & individually programmable

The PaperJet® Fit produces narrow, extra-strong embossed padding from a length of 10 cm that is particularly suitable for your smaller packages. The system impresses through its extremely compact design, with reduced dimensions that make it perfect for integration in existing processes.

Removal, supply or continuous mode can be selected to suit your needs using the display included in the scope of delivery. Continuous selection of both the speed and padding lengths is also possible. Convenient operation is also a priority when it comes to the automatic paper intake function, with the feed button making it child's play. Undesired production interruptions are eliminated, as the special conveyor technology employed prevents paper jams. The eco-friendly paper used is 100 % recycled – and a Blue Angel award winner.

Your one-stop provider – Made in Germany

Production of the machine and paper conserves resources, conforms to the latest technical standards and is realised exclusively in Germany with the assurance of ISO 50001 certification.
